

Zaptec Column

A charging companion 

The Zaptec Column is a high-quality pillar designed for effortless mounting of Zaptec Pro and Zaptec Go charging stations in open landscapes. Plan your electric car charging experience with stylish expression.

The column is powder-coated and features a black front cover that can be quickly removed to access the connection box. Ground mounting is straightforward, with four bolt holes at the bottom, compatible with the standard CC160 base.

The Zaptec Column is available in black and supports up to two charging stations per column.

Down to the details
